Artificial Intelligence is significantly changing the way companies do business. Entire industries are being transformed by AI technology and successful business leaders need to embrace AI Analytics or risk falling behind.

Alithya's AI Enablement Solution helps organizations achieve real results. Alithya helps businesses create an AI pipeline that maximizes ROI and establishes an **automated AI environment** that meets business objectives.

BENEFITS OF AUTOMATED AI ANALYTICS

- Allows Business Analysts to perform AI analytics with minimal involvement from the Data Science team, resulting in more AI Analytics with existing limited Data Science resources
- Provides clear explanation of AI analytics results, enabling management to move from predictive to prescriptive analytics
- Enables quick and easy deployment and integration of AI Analytic models into production, maximizing the impact of AI Analytics on day-to-day business operations
- Automates model documentation to meet regulatory requirements of model transparency

WHY CHOOSE ALITHYA?

Implementing AI has its challenges and data scientists with concrete experience in implementing business solutions are hard to find.

- Alithya combines deep knowledge of the organization's specific business problems and the technical expertise to perform AI analytics
- Alithya's AI team are experts in interpreting models and enabling management to derive actionable business insights
- Alithya has a proven track record of success in deploying and integrating AI models into production systems with significant impact on the business
