

Askida CT

Going beyond test automation

Askida CT

- > Askida CT is a comprehensive test automation platform that allows your QA team to create tests without needing deep technical skills while guaranteeing software quality.

The benefits of Askida CT:

- > Tests are executed and validated in a few minutes. Testing is faster, easier and more efficient.
- > Manual scripts can be integrated without having to modify or duplicate them.
- > All test data can be automatically and systematically prepared.

Documenting, automating, executing and analyzing tests

A comprehensive approach to continuous testing

AUTOMATING

> Keyword driven testing

- > Keywords allow you to perform tests quickly and easily without needing deep programming skills.

> Continuous testing

- > Constantly test an application or a system in its entirety. Add automated testing to your continuous integration pipeline using its API.

> Multi-technology testing

- > Automate testing in ALL technological environments and in ALL programming languages.

EXECUTING

> Total Agile and DevOps integration

- > Automated tests are easily integrated to an Agile or DevOps software development process that includes continuous testing.

> Automated and manual testing

- > Combine and execute automated and manual testing. You can also convert manual tests into automated tests (or inversely).

> One tool for your entire team

- > Whether they are QA specialists, developers or managers.

- > Automate continuous testing and closely monitor the quality of your applications throughout the development cycle thanks to the powerful features and intuitive interface of Askida CT.

- > **CUT YOUR WORKLOAD BY 40%**
- > **REMOVE 95% OF BUGS**
- > **ORCHESTRATE AUTOMATED TESTS**
- > **SAVE ON COST AND TIME**
- > **IMPROVE YOUR TESTS AND SCRIPTS**
- > **STAY IN CONTROL OF YOUR PROJECTS**

ANALYZING

> Reports and dashboard

- > View all test results together in one centralized dashboard to quickly identify the root cause of an error or bug. Export reports to an Excel or HTML format.

> Changes in test results over time

- > Monitor an application's quality closely throughout its development cycle and see how test results are changing over time.

DOCUMENTING

> Test scenarios

- > Easily document testing plans—for both manual and automated tests—only once.
- > Document automated scripts in a user-friendly and intuitive interface with strong support from the scripting software.

With Askida CT, you can:

- Prepare environments and test data using keywords.
- Coordinate the execution of a sequence of automated tests.
- Repeat automated testing at any time, without manual intervention throughout the application development cycle.
- Quickly analyze pass/fail results with detailed reports.
- Convert testing plans from the automated to the manual mode (and inversely) in one click.
- See the full list of keywords in real time in the Askida CT menu.
- Get an overview of the project's progress and the development of scripted and unscripted tests, as well as the advance in automated testing relative to manual testing.
- Improve applications' compliance, quality and security.
- Test all programming languages on all technological platforms.

KINDS OF AUTOMATED TESTING:

- Functional testing
- Non-regression testing
- Integration testing
- Usability testing
- Acceptance testing
