Alithya GoTest: A guarantee of Quality

Alithya GoTest is an adaptable test automation platform that takes quality assurance to a new level. Create automated tests quickly without the need for deep technical skills.

Alithya GoTest is the only test automation and continuous testing platform developed for QA professionals, regardless of their level of technical knowledge. Create test scripts tailored to your needs in just a few minutes using keywords, program all your automated tests to test an application or an entire system quickly and thoroughly and view the results in a visual, accurate dashboard.

Boost Your Productivity

Our platform is compatible with all test automation tools. Alithya GoTest integrates and runs all your scripts sequentially to check your entire business process, filling in gaps in your automation tools while boosting their efficiency.

Alithya GoTest: Benefits for The Whole Team

DEVELOPERS

Each automated test produces a detailed, accurate report, so you can quickly identify the root cause of an error or bug.

The keywords library can be customized to make it easier to create new keywords.

Test scripts can be linked directly to the test case documentation.

QA SPECIALISTS

Text editor for test plan documentation.

Tests using keywords.

Manual tests can be converted to automated tests (and vice-versa).

Contextual help module to manage keyword entry.

Users can copy information at all levels of the editor (project, test plan, functionality, scenario, step, keyword).

MANAGERS

Centralized dashboard gives you an overview of all the information.

Test reports in Excel or HTML format.

User management and creation of unique user identifiers.

Document, Script, Execute & Analyse

Test your overall application or system, with no manual input. Access detailed test results.

Find bugs early in your application's development process.

View all test results together in one centralized dashboard and send your reports to your manager.

Monitor an application's quality throughout its development cycle and see how test results change over time.

Reduce your development costs by testing earlier and more often.

Compatible with all IT environments; tests your application end-to-end.
