

Online Work Management Reporting

Key Benefits

- > Fleet-wide Consistent and Accurate Reports and Measures
- > Minimize Costs for Resources, Schedules, Parts, Backlog, etc.
- > Improve Process efficiency and Milestone Discipline
- > Improve Reliability, and Backlog Management
- > Improve Focus and Accountability in the Resolution of Issues

Nuclear facilities are currently faced with a number of industry-wide challenges. There is visible pressure to be increasingly cost-effective without sacrificing safety or reliability. Traditionally, in-house solutions have been sufficient; however, given the current industry climate, there remains a significant amount of manual effort in the generation and analysis of performance reports. It is unsustainable for internal staff to knowledgeably support and maintain these solutions while meeting stakeholder expectations for ongoing standards alignment, fleet-wide consistency, and additional data insight and forecasting tools, etc.

Improve Online Cost-Effectiveness, Efficiency, and Reliability

CASSI™ Online Work Management Reporting Software supports the continuous improvement of Nuclear Online Preparation, Execution, Backlog, and Reliability-centered activities. The software is designed to allow Fleet Managers, Work Week Managers, Planners, Operations and Maintenance staff to drive accountability for the work assigned and to consistently and accurately track progress against milestone-driven performance goals. CASSI™ provides deep business insight into where opportunities exist in the Work Management process to avoid delays, save time, save money, and optimize the use of resources.

Key Performance Measures: Preparation and Execution

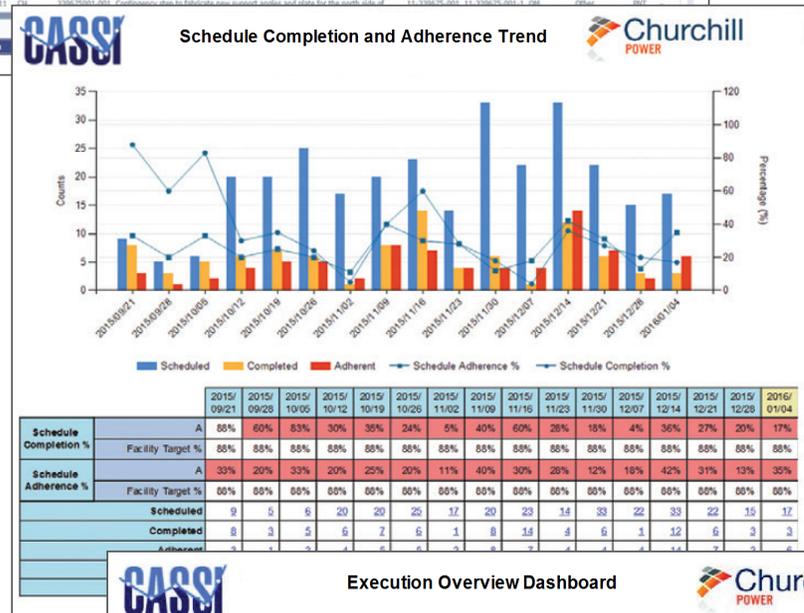

- > Scope Survival and Stability
- > Permits, Clearances, Walkdowns
- > Parts Availability, and Long-Lead Parts
- > Job Hazard Analysis, and ESME
- > Resource Loading, and Stability
- > Risk Reviews
- > Critical Scope Survival
- > Schedule Adherence and Completion
- > Emergent Work and Carryover

Key Features

- Fully Automated Report Generation and Delivery
- Augments all popular EAMS and Scheduling Systems
- Dashboards, Trends, and Work Details
- Performance Trends, History, and Auditing
- Responsive Support and active Product Enhancements
- Self-serve User Configuration

Support and Maintenance

CASSI™ customers enjoy highly responsive support services and product enhancements driven by key industry objectives. Alithya provides a variety of licensing, hosting, and support options to best suit your business needs.
