Are You Dealing with Financial Restatements and Inconsistent Account Structures?

The Alithya Hyperion Financial Management (HEM) offering is a full implementation of the HEM application. Alithya's Consolidation practice specializes in Hyperion consolidation applications and its complementary technologies. Alithya's strong ties with the Oracle/Hyperion development team allow Alithya to shape the latest products from Oracle while aligning best practices with company vision.

The Deliverable

The Alithya comprehensive project methodology ensures a high-value implementation of clients' business requirements quickly and efficiently. Successful Hyperion Financial Management engagements provide valuable experience that offer leading edge methodologies and tools to better navigate common implementation pitfalls. These experiences translate to faster, higher quality, and lower risk for clients.

Documentation deliverables include:

- > Requirements Gathering and Documentation
- > Detailed Project Plan with Resource Leveling and Timelines
- > Key Stakeholder Interviews/Analysis
- > Design Specification and Document
- > Unit/Integration/Performance/User Acceptance Testing
- > Training Program
- > System Administrator and End User Documentation
