

## Lightning Cloud Accelerators: ARCS Quick Start

### Key Features of ARCS

- > Multi-user reconciliation with powerful out of the box features
- > Flexible workflow capabilities
- > Built-in data integration features
- > Easy-to-use Web Interface
- > Out of the box reports and dashboards
- > Proven and scalable architecture
- > Robust integration with ERP systems and other sources
- > Full set of administrative tools for application management
- > Cloud-based deployment model with subscription pricing

### Key Benefits of ARCS

- > Reduce reconciliation cycles by days or weeks
- > Improve reporting accuracy
- > Deploy quickly with no internal IT hardware or software requirements

### Key Benefits of ARCS Quick Start

- > Maintain rich reconciliation functionality without IT hardware and support costs
- > Gain access to Oracle's support and maintenance services
- > Ability to later extend and further automate the reconciliation process

### EPM in the Cloud

Oracle Account Reconciliation Cloud Service (ARCS) enables organizations of all sizes to quickly adopt a world-class account reconciliation solution with no infrastructure investments.

### Alithya's ARCS Quick Start

Alithya Lightning Cloud offerings for EPM accelerate your ride to the Cloud. Our ARCS Quick Start solution will help you quickly and easily begin your hosted deployment in the Cloud. The solution can reduce the amount of time needed to get the application deployed in the Cloud.

### Offering

Affordably stand up an Oracle ARCS environment.

- > Set up development and production instances in an ARCS pod
- > Configure ARCS system settings, including 2 chart segments
- > Configure formats and profiles for Account Analysis reconciliations
- > Build a data interface using the included Data Management module for a single G/L source
- > Assign and set up access and workflow for up to 10 Users
- > Train the trainer approach for up to 10 Users
- > Knowledge Transfer on system maintenance, navigation, Security/Workflow Management, Application Management and Backups, and overall ARCS best practices

### Why Go to the Cloud?

- > Reduce internal IT hardware & software requirements & reduce cost of ownership
- > Full, integrated Oracle support
- > Automatic patching/updating, regular backups, and early access to new features
- > Core reconciliation functionality accessible anywhere
- > No special tools needed for remote access results in ease of use
- > Expand user integration to mobile solutions like tablets and phones
