

Lightning Cloud Accelerators: FCCS Quick Start

Key Features of FCCS

- > Multi-dimensional/multi-user consolidation with a powerful business rules engine
- > Flexible workflow & close management capabilities
- > Comprehensive Microsoft Office integration
- > Easy to use Web Interface
- > Seamless creation of reports and dashboards
- > Proven and scalable architecture
- > Robust integration with ERP systems and other sources
- > Full set of administrative tools for application management
- > Cloud-based deployment model with subscription pricing

Key Benefits of FCCS

- > Reduce close cycles by days or weeks
- > Improve reporting accuracy
- > Deploy quickly with no internal IT hardware or software requirements

Key Benefits of FCCS Quick Start

- > Maintain rich reporting functionality without IT hardware and support costs
- > Gain access to Oracle's support and maintenance services
- > Ability to later extend the solution to other close process components

EPM in the Cloud

Oracle Financial Close and Consolidation Cloud Service (FCCS) enables organizations of all sizes to quickly adopt world-class close and consolidation applications with no infrastructure investments, offers flexible deployment options, and provides fast time-to-value.

Alithya's FCCS Quick Start

Alithya Lightning Cloud offerings for EPM accelerate your ride to the Cloud. Our FCCS Quick Start solution will help you quickly and easily move to a hosted deployment in the Cloud. Utilizing internally developed accelerators leveraging our expertise on Oracle's PBCS platform, the solution can reduce the amount of time needed to get the application deployed in the cloud.

Offering

Affordably stand up an Oracle FCCS environment.

- > Set up development and production instances in an FCCS pod
- > Create an FCCS application with up to 1,000 entities and 5,000 accounts
- > Build 5 custom data forms, 5 custom calculations, and 5 financial statement reports
- > Create security model and assign and set up access for up to 10 users
- > Build one data interface using Data Management for a single G/L source
- > Integrate two years of historical data
- > Knowledge transfer on system maintenance, navigation, security management, application management and backups, and overall FCCS best practices

Why Go to the Cloud?

Affordably convert a Hyperion Enterprise application to an Oracle FCCS environment.

- > Reduce internal IT hardware & software requirements & reduce cost of ownership
- > Full, integrated Oracle support
- > Automatic patching/ updating, regular backups, and early access to new features
- > Core consolidation and reporting functionality accessible anywhere
- > No special tools needed for remote access results in ease of use
- > Expand user integration to mobile solutions like tablets and phones
