

Lightning Cloud Accelerators: Ground to Cloud

Key Features of PBCS

- > Multi-dimensional/multi-user planning with a powerful business rules engine
- > Flexible workflow & plan management capabilities
- > Comprehensive Microsoft Office integration
- > Easy to use Web Interface
- > Seamless creation of reports and dashboards
- > Proven and scalable architecture
- > Robust integration with ERP systems and other sources
- > Full set of administrative tools for application management
- > Cloud-based deployment model with subscription pricing

Key Benefits of PBCS

- > Reduce budgeting and planning cycles by weeks or months
- > Improve forecast accuracy
- > Deploy quickly with no internal IT hardware or software requirements

EPM in the Cloud

Oracle Planning and Budgeting Cloud Service (PBCS) enables organizations of all sizes to quickly adopt world-class planning and budgeting applications with no CAPEX infrastructure investments, offers flexible deployment options, and provides fast time-to-value.

Alithya's Ground to Cloud

Alithya Lightning Cloud offerings for Planning and Budgeting accelerate your ride to the Cloud. Our Ground to Cloud solution will help you easily and quickly move from an on-premise Oracle Hyperion Planning deployment to one hosted in the Cloud. Utilizing the built in tools, the solution can accelerate the process of taking an existing and fully functioning Planning application and making it available for all users in the Cloud with minimal modifications.

Offering

Affordably move an existing single Planning application from an on-premise or hosted solution (v11.1.2.3 or higher) to an Oracle PBCS environment.

- > Set up Development and Production Instances in a PBCS Pod
- > Migrate a single Planning Application with up to three Custom BSO Plan Types
- > Unlimited WebForms and Financial Reports moved in to the PBCS environment
- > Review security model, rebuild security in MyServices/Application Management, and assign and set up access for up to 25 Users
- > Build one data interface using PBCS Data Mgmt in place of an existing Load Rule
- > Integrate all data currently in the Planning database into the cloud
- > Knowledge Transfer on metadata maintenance, using the Simplified Interface, MyServices Security Management, Application Management and Backups, and overall PBCS best practices

Key Benefits of Ground to Cloud

- > Maintain existing Planning and SmartView functionality without IT hardware and support costs
- > Gain access to Oracle's support and maintenance services
- > Ability to later extend the solution to other planning process components

Why Go to the Cloud?

- > Reduce internal IT hardware & software requirements & reduce cost of ownership
- > Full, integrated Oracle support
- > Automatic patching/updating, regular backups, and early access to new features
- > Core functionality expected of Planning and SmartView accessible anywhere
- > No special tools needed for remote access results in ease of use
- > Expand user integration to mobile solutions like tablets and phones

**Proven Partner for
EPM, BI and BD Solutions**
